Family-sized Fun and Adventure

Let the Adventure Begin

Adventure begins with a Bellabike. Our cargo bike is not merely a transport vehicle but also a rather fantastic way to launch an exciting series of pleasurable experiences for the whole family.

Practical and Pleasurable Child Transport

Give yourself and your children a wonderful gift. Place your kids in the cargo box, buckle them in and start pedalling. You'll soon discover how negotiating traffic becomes an easy and elegant affair. A bike ride with the kids has never been easier or more pleasurable. In the midst of a busy day you now have the opportunity to combine practical tasks with relaxing ease-of-use. You can get all the shopping done and run your other errands, all while spending quality-time with your children.

Easy Urban Use

The distinct rear-wheel steering design on a Bellabike makes maneuvering a breeze. You'll find it easier to get around in the city by being able to 'turn on a dime' and weave your way elegantly past all obstacles - without losing eye contact with your kids in the cargo box. Not to mention eliminating the need for finding a parking spot.

Why Should You Choose a Bellabike?

Quite simply: it's cheaper and more fun than a car! It's easier and faster to get around the city, especially in rush hour, and the safety box provides exceptional protection for the children. Even with a full load you'll enjoy maximum maneuverability and ease-of-use.

Let's Get Personalised

With Bellabike you can choose a solid colour or a design. The standard colour is black but you can choose other colours at extra cost. Or you can design your own, unique decals for the sides of the cargo box. The decals are made of the same weather-resistant material as outdoor signs for advertising or shopfronts. Any motive you can dream up is possible, whether they are digital photos or graphics. It is an advantage to have a personalised bike that stands out in the crowd. Not least because it is less attractive to steal if it's easily recognizable.

Completely Customized

The Bellabike is an all-round cargo bike. The customizable cargo box has room for four children and a couple of large bags of groceries. You can start without any seats and then add to the bike as your family grows and your needs change. The specially-designed retractable canopies keep things dry on rainy days.
